EXHIBIT A

FINDINGS

- A. The proposed project complies with Costa Mesa Municipal Code Section 13-29(g)(2) because:

Finding: The proposed development or use is substantially compatible with developments in the same general area and would not be materially detrimental to other properties within the area.

Facts in Support of Findings: The proposed use is a manufacturing and distribution use and, with the recommended COAs, would be consistent with the other industrial uses in the immediate vicinity. Compliance with the COAs, as discussed in the following section, would allow this use to operate with minimal impact on surrounding properties and uses.

Finding: Granting the conditional use permit will not be materially detrimental to the health, safety and general welfare of the public or otherwise injurious to property or improvements within the immediate neighborhood.

Facts in Support of Finding: The proposed manufacturing and distribution use will be within an existing building and is consistent with the PDI zoning of the property and the properties immediately abutting the site. The recommended COAs, including those related to compliance with building and fire codes, are intended to ensure that the use would not be materially detrimental to the health, safety and general welfare of the public or be otherwise injurious to property or improvements within the immediate neighborhood. Measures designed to maintain security at the facility, as proposed and conditioned, include – but are not limited to -- a monitored video surveillance system (covering all exterior entrances and all interior spaces of the facility).

Finding: Granting the conditional use permit will not allow a use, density or intensity which is not in accordance with the general plan designation and any applicable specific plan for the property.

Facts in Support of Finding: The use is consistent with the General Plan goals and policies as evaluated in the staff report. The proposed use will be within an existing building and there are no proposed additions to the building; therefore, there is no change to density or intensity. In addition, the proposed use is a conditionally permitted use in the industrial zone.

- B. **Finding:** The project is exempt from the provisions of the California Environmental Quality Act (CEQA) under CEQA Guidelines Section 15301 (Class 1) for Existing Facilities. This exemption applies to the operation of existing structures involving negligible or no expansion of the use. The project involves no exterior additions to

the existing industrial building. The project is consistent with the applicable General Plan designation and all applicable General Plan policies as well as with applicable zoning designation and regulations.

- C. The project is exempt from Chapter XII, Article 3 Transportation System Management, of Title 13 of the Costa Mesa Municipal Code.
